

METHODOLOGICAL APPROACHES IN MANAGEMENT OF ATOPIC DERMATITIS CHALLENGE AT PRESENT

N.G. GOROVENKO, O.I. LASITSA, L.D. KALUZHNA, L.S. OSIPOVA

Summary

Atopic dermatitis (AD) is a separate nosological unit. It is characterized by multiple organs involvement, making a real challenge for different health care institutions. The article presents the modern approaches to pathogenesis, diagnosis and treatment of AD. A number of organizational measures must be introduced for timely revealing and effective treatment of AD patients.
