

THE WAYS OF THE TREATMENT OF THE BRONCHIAL ASTHMA.

T. V. Bezdetko, T. Y. Khimich, E. V. Avdeeva

Summary

The problem of the optimal therapy's working of the bronchial asthma stays important. Don't mind on development of pharmacotherapy of this group of the illnesses. It can't provide the whole physical and social rehabilitation of the patients. Under medical observation were 63 ill people by bronchial asthma of the light degree that had sensebilization to the pollen allergy. We got the positive results from the complex therapy that consists of basical treatment of IGCS, SIT and rehabilitation therapy in the conditions of the salt-mine. It gets the chance of control the passing a bronchial asthma.
