

SOME INDICES OF THE MUCOSAL LOCAL DEFENCE AND INFLAMMATORY ACTIVITY AT PATIENTS WITH CHRONIC OBSTRUCTIVE PULMONARY DISEASE

O. I. Lemko, M. L. Gabor, I. S. Lemko, D. V. Reshetar

Summary

Some indices of the mucosal local immune defense, levels of nitrogen oxide stable metabolites and sputum cytograms were studied at patients with mild and moderate chronic obstructive pulmonary disease. The peculiarities of investigated indices were analyzed depending of COPD severity.
