

# **BRONCHIAL ASTHMA AND ALLERGIC RHYNITIS IN CHILDREN: POSSIBILITIES OF GETTING CONTROLE**

**Besh L. V., Bodnarchuk Y. O.**

## ***Summery***

The paper represents the analysis of results of studying the diagnosis and therapy of accompanying allergic rhynitis in children with various digrees of bronchial asthma controle. The paper also represents the results of using the diagnostic algorithm and therapy tactics in the children which gave us ground to get controle in 29 (80,56 %) of patients, which is markedly higher than the initial (28,17 %) and general statistic indices.
