

MECHANISMS OF FORMATION NEUTROPHILIC PHENOTYPE OF SEVERE BRONCHIAL ASTHMA

G. P. Pobedyonna, P.M. Malish, T. A. Pobedyonna

Summary. *The mechanisms of formation neutrophilic phenotype of severe bronchial asthma are considered in article. This mechanism is a result of recruitment of neutrophils with inhibited phagocytic properties but increased properties to the secretion of interleukin-8 due to presence of oxidative stress in tracheo-bronchial tree of the patients.*

Key words: *bronchial asthma, neutrophilic phenotype.*
