

# EXPERIENCE OF REALIZATION OF VACCINATION AGAINST HYDROPHOBIA FOR PATIENT WITH SERUM ILLNESS ON VACCINE OF KoKAV

*V. E. Makarenko, A. A. Romanova, A. Y. Samoilenko,  
E. M. Dytjatkovskaja*

**Summary.** *The article describes a clinical case of rabies vaccination in a patient with serum sickness. In the presence of serum sickness and the need for vaccination by life indications, patients should be vaccinated by Bezredko followed by GCS in the facilities of allergy center. It is compulsory to investigate the Ig G titers to the virus of the disease against which we do vaccinate in order to determine the multiplicity of vaccination.*

**Key words:** *serum illness, vaccination, arthralgia, vasculitis, hives, Bezredko.*
