**Abstract.** In 2025, European Respiratory Society (ERS) Congress was held from 27 September to 1 October in Amsterdam, the Netherlands. In 2025 the Congress theme was Respiratory health around the globe. The main theme will address the global burden of respiratory diseases across all age groups, from infants to the elderly, the differences and similarities in respiratory health problems across countries, and global solutions to improve respiratory health.

**The aim:** to analyze abstracts of scientific works on pulmonology and phthysiology that were presented by Ukrainian scientists at the ERS International Congress 2025.

**Materials and methods.** The data regarding the scientific reports were obtained from the official ERS Congress website and the online program.

**Results.** Scientists from Ukraine presented 78 reports at the Congress: 73 on pulmonology and 5 on phthysiology, which is 1,45 % (78 out of 5359) of all abstracts submitted to this forum. The largest number of Ukrainian papers — 24 — was devoted to the problems of bronchoobstructive pathology (10 to the issues of chronic obstructive pulmonary disease and 4 — of bronchial asthma). There were 5 papers on COVID-19, 9 about artificial intelligence and digital health technonolies, 8 related to tobacco smoking. In 2025, both international cooperation and interaction of Ukrainian pulmonologists of various institutions in joint work within the country continued.

**Conclusions.** The main directions of scientific developments in respiratory medicine in Ukraine are issues of broncho-obstructive pulmonary diseases, artificial intelligence and tobacco smoking. The most active participation in the event were taken by the scientists from the National scientific center of phthysiatry, pulmonology and allergology named after F. G. Yanovskyi National Academy of medical sciences of Ukraine, Dnipro State Medical University and National Pirogov Memorial Medical University, Vinnytsya.

**Key words:** ERS International Congress, scientific work, Ukrainian scientists' research, tuberculosis, pulmonology.
