

**RADIO- AND ULTRASOUND INVESTIGATION IN  
ESTIMATION OF DEGREE OF REGRESSIONS OF  
THE MALIGNANCY OF MUSCULOSKELETAL  
SYSTEM UNDER INFLUENCE  
OF NEOADJUVANT THERAPY**

*T.S. Golovko, I.M. Dykan*

**Summary.** Analysed the results radio-, ultrasound and morphologic investigations and valuation of efficiency of therapy of 134 patients with different histological types of sarcoma of musculoskeletal system. Expediency of complex ultrasound investigation was proved.

**Key words:** *spiral computer tomography, magnetic resonance imaging, ultrasonography, sarcoma of musculoskeletal system, color and energetic Doppler ultrasonography, volume part of vitality tumors tissues, sarcoma of soft tissue, malignant tumors of bones.*
