

**THE EFFECTIVENESS
OF DIGLUKAL-LIGAND
DURING THE TREATMENT OF MICE
WITH CARCINOMA LEWIS MODEL**

*E.I. Suslov, T.P. Podgayevskya,
S.D. Kuzovkova, I.V. Liskina*

Summary. Antitumoral mechanisms and effects of a diglukal-ligand are listed, during the treatment of mice (line C 57 BL) with experimental Lewis lung carcinoma. Maximal therapeutic dose, high anti-metastatic effect and hypotoxicity of diglukal-ligand were determined.

Keywords: *diglukal-ligand, treatment, Lewis carcinoma, apoptosis, proliferation.*
