

**INFLUENCE OF ADMINISTRATION OF  
REOSORBILAKT ON THE DYNAMICS OF  
LABORATORY BIOCHEMICAL INDEXES IN  
PATIENTS WITH ONCOLOGIC PATHOLOGY  
OF COLON IN THE EARLY  
POST-OPERATIVE PERIOD**

**Summary.** The results of the conducted research testify that application of reosorbilakta in a dose of 6 to 10 ml/kg/day is instrumental in the positive dynamics of laboratory-biochemical indexes at patients by oncologic pathology of thick intestine in an early postoperative period.

**Key words:** *reosorbilakt, oncologic pathology of the colon, the biochemical blood values and blood gases.*
