

# HEMODYNAMIC EFFECTS OF HAEKODES INFUSION IN PERIOPERATIVE PERIOD OF PATIENTS WITH PURULO-NECROTIC BENIGNS DIABETIC FOOT

*V.J. Lusenko, E.A. Karpenko, A.N. Solovej,  
M.A. Golyanischev*

**Summary.** The features of central haemodynamics of patients with purulo-necrotic complications of diabetic foot are demonstrated. The improvement of the haemodynamic profile as a result of the usage of Haekodes in this group of patients in the perioperative period operated under the subarachnoid anesthesia is revealed.

**Key words:** *haemodynamics, purulo-necrotic complications of diabetic foot, subarahnoid anesthesia, infusion therapy, perioperative period.*
