

# USING LAVOMAX IN COMPLEX TREATMENT OF PATIENTS WITH NON SEVERE COMMUNITY-ACQUIRED PNEUMONIA

*K.A. Goncharov*

**Resume.** The results of examination and treatment of 100 patients with no severe community-acquired pneumonia. Particular attention is paid to the results of treatment with interferon inducer Tilorone (Lavomax). Analysis of the results of the study confirm, that the use of the drug Lavomax in the treatment of patients with community acquired pneumonia of viral etiology can reduce the term manifestations of intoxication syndrome.

**Key words:** *community-acquired pneumonia, viral pneumonia, tiloron.*
