

MODERN GOING TO TREATMENT OF ACUTE INFLAMMATORY DISEASES OF GENITAL ORGANS

V.V. Lebedyuk, N.Zh. Akasheva

Resume. These researches of comparison of efficiency of two charts of treatment of acute salpingoophoritis are resulted in the article. It is set that chart of treatment, in which as an antibacterial component was used a fluoroquinolones for infusion levofloxacin (leflocin) and gatifloxacin (bigaflon) is clinically and microbiologically more effective, than chart with the use of the combined therapy with cepalosporines 2–3 generations in combination with doxiciclin and metronidazol. Besides complex therapy with the use of fluoroquinolones for infusion diminishes duration of antibacterial therapy, that testifies to economic advantage of its application.

Key words: *acute salpingoophoritis, antibiotic therapy, levofloxacin, gatifloxacin.*
