

**COMPENSATORY MECHANISMS
AT ACIDOSIS. PATHOGENETIC GROUNDING
OF NONINTENSIVE INFUSION THERAPY
OF ACIDOSIS**

V. V. Petrushenko, N. A. Rikalo, V. A. Rautskis

Summary. The article presents current views on mechanisms of development and compensatory-adaptive reactions in gas and nongas acidosis. The principles of pathogenetic correction of acidosis from the point of view of mechanisms of action of different infusion solutions are discussed.

Keywords: *acidosis, compensatory mechanisms, nonintensive infusion therapy.*
