

APPLICATION OF REOSORBILACT IN THE TREATMENT OF PATIENTS WITH ALCOHOL INTOXICATION

F. S. Glumcher, O. V. Strepetova, M. V. Perebiynis

Summary. The results of the successful use of Reosorbilact as a detoxifying agent in the treatment of patients with alcohol intoxication of varying severity are presented. The drug restores blood volume by action of sorbilact on the elimination of extracellular fluid and stimulate urine output, thus reducing swelling and accelerates the binding of exo- and endotoxins, corrects acidosis and restore electrolyte balance.

Keywords: *alcohol intoxication, treatment, Reosorbilact.*
