

**APPLICATION OF REOSORBILACT
AND SORBILACT IN SURGICAL TREATMENT
OF COLORECTAL CANCER**

O. I. Yevtushenko, I. V. Kuhar

Summary. This paper analyzes the results of infusion therapy by Reosorbilact and Sorbilact 36 patients with colorectal cancer who underwent radical, palliative and symptomatic surgery. Side effects associated with the use of infusion solutions are not fixed. The results indicate the feasibility of reosorbilact and sorbilact inclusion in the protocol of pre- and postoperative management of these patients.

Keywords: *infusion therapy, Sorbilact, Reosorbilact, colorectal cancer, surgical treatment.*
