

THE EPIDEMIOLOGY OF TUBERCULOSIS IN CHILDREN OF UKRAINE

*V.M. Melnyk, L.I. Mykolychyn,
T. S. Kucher, L.F. Antonenko*

Summary

The epidemiological indices of tuberculosis in children of Ukraine for the period of 1991–2000 were analyzed. It was registered a 2-fold increase of those indices. The measures for prevention of tuberculosis in children were proposed.
