

SAFETY OF HYPEROSMOLAR SOLUTION OF SORBITOL IN PATIENTS WITH CHRONIC RESPIRATORY DISEASES, COMPLICATED BY HEART FAILURE

N. I. Gumenyuk

Summary

Based on clinical evaluation of tolerability and the dynamics of heart sonography indices there was studied the safety of medicine sorbilact in patients with decompensated cor pulmonale. Sorbilact in a dose 400 ml, administered intravenously, was well tolerated and didn't affect functional condition of both right and left heart ventricles.
