

EFFICACY OF ERIUS (DESLORATADINE) IN TREATMENT OF ALLERGIC DISEASES IN CHILDREN

V. P. Kostromina, E. A. Rechkina

Summary

A study of efficacy of Erius (desloratadine) in 30 children with asthma was conducted. It was established that Erius was highly effective and safe medicine. It caused significant anti-inflammatory effect in patients with mild and moderate asthma with concomitant rhinitis, atopic dermatitis. Being antihistamine and anti-inflammatory medicine, quickly interrupting manifestation of allergic rhinitis (including nasal congestion) and improving asthma and atopic dermatitis course, it improves effectiveness of treatment of allergic diseases and patients' quality of life.
