

FATTY ACIDS METABOLISM IN PATIENTS WITH CHRONIC OBSTRUCTIVE PULMONARY DISEASE WITH CONCOMITANT HEPATO-BILLIARY DISORDERS

L. I. Sokolova

Summary

In combination of pulmonary and hepato-biliary disorders it is observed an elevation of blood level of arachidonic acid, released from biological membranes in result of increased lipid peroxidation. In order to achieve positive clinical effect of metabolic conversion of fatty acids it is advised to increase the rate of seances of interval normobaric hypoxic therapy in patients with combined disorders.
