

AN EXPERIENCE OF APPLICATION OF AMOXICILLINE/CLAVULANIC ACID (AMOXICLAV®) IN PATIENTS WITH EXACERBATION OF CHRONIC OBSTRUCTIVE PULMONARY DISEASE

*T. A. Pertseva, Ye. V. Bratus, O. V. Plehanova,
O. Yu. Kononovich*

Summary

We examined 28 patients (22 males and 6 females) 41-77 years old with Anthonisen types 1 and 2 exacerbation of COPD. We revealed the absence among the pathogens of *Moraxella catarrhalis* and high prevalence of *H. influenzae*.

Combination medicine amoxicilline/clavulanate (Amoxiclav®) demonstrated high bacteriological and clinical efficacy in treatment of patients with exacerbation of COPD.

The medication had low toxicity and it was tolerated well. Simplicity of treatment regimen improved patient's compliance.
