

QUALITY OF LIFE OF PATIENTS WITH ASTHMA ON THE BACKGROUND OF COMPLEX TREATMENT USING ACOUSTIC VIBRATORY LUNG MASSAGE

O. A. Korobko, V. P. Malenkiy, Y. V. Babijchuk

Summary

118 asthma patients were examined: 48 patients of the control group received only basic medicinal treatment; 70 patients of main group along with basic treatment received acoustic vibratory lung massage. The quality of life of asthma patients was evaluated using Ukrainian version of questionnaire MOS SF-36. The results of analysis confirmed statistically significant improvement of quality of life in asthma patients, which received acoustic vibratory lung massage.
