

# UNIVERSAL DIAGNOSTIC ALGORITHM OF TUBERCULOSIS OF DIFFERENT LOCALIZATIONS

*O. V. Panasiuk, V. O. Panasiuk, A. V. Radysh*

## *Summary*

Diagnostic algorithm of tuberculosis of any localization, including HIV-associated tuberculosis, specifies combined use of at least one of three strategic criteria of tuberculosis etiology with at least one of five manifestations of intoxication syndrome. Classical mono-, bi- and multiple organ symptom complex, depending on the clinical presentations of the tuberculosis affected organs should also be considered.
