

EFFICIENCY OF TREATMENT OF LUNG TUBERCULOSIS PATIENTS DEPENDING ON THE CONDITION OF BRONCHIAL TREE

I. T. Pyatnochka, S. I. Kornaha

Summary

The data about frequency and a character of bronchial pathology in different types and clinical forms of lung tuberculosis were presented in this article. Depending on the condition of bronchial tree a clinical course, functional condition of lungs and heart and the results of treatment, were analyzed in patients with newly diagnosed infiltrative lung tuberculosis.
