

# HAEMOREOLOGICAL AND IMMUNE DISTURBANCES AND EFFECTIVENESS OF FENSPIRIDE IN PATIENTS WITH CHRONIC OBSTRUCTIVE PULMONARY DISEASE

***P. F. Dudka, D. V. Dobryanskiy, N. G. Bichkova***

## *Summary*

The peculiarities of haemoreological disturbances and their influence on immune response in patients with chronic obstructive pulmonary disease (COPD) were presented in the article. The effectiveness of fenspiride in providing normalization of haemoreological status was confirmed. The most positive effect of fenspiride was observed in patients with attenuated immune response.
