

# CORRECTION OF GLUTATHIONE SYSTEM IN PATIENTS WITH COMMUNITY-ACQUIRED PNEUMONIA

***R. V. Razumnyy***

## *Summary*

The glutathione system was evaluated in patients with community-acquired pneumonia (CAP) with underlying liver diseases during the course of treatment with immunomax. It was established that the use of immunomax improved the condition of glutathione system: a normalization of glutathione basic fractions and oxidized/reduced glutathione ratio, as well as an increase the activity of specific enzymes of glutathione system were achieved.
