

THE APPROACHES TO THE ORGANIZATION OF TREATMENT OF PATIENTS WITH PULMONARY TUBERCULOSIS IN MODERN CONDITIONS

Yu. I. Feschenko, V. M. Melnik, V. G. Matusevych, V. A. Yuchimets, I. A. Novozhilova, M. I. Linnik, L. F. Antonenko

Summary

The modern principles of organization of treatment of patients with pulmonary tuberculosis in Ukraine were presented in the article. A special attention was paid on implementation of new report forms and antituberculous drug supply using both State budget and non-budgetary sources. The method of directly controlled treatment in out-patient and hospital settings was presented.
